

MasterCard®; SecureCode®; je nova usluga MasterCard-a i izdavatelja vaše kartice koja Vam pruža dodatnu sigurnost prilikom online kupovine. Za korištenje ove usluge nije Vam potrebna nova MasterCard ili Maestro®; kartica. Vi birate svoj osobni MasterCard SecureCode i nikada ga ne dijelite s bilo kojim internet trgovcem. Privatni kod znači dodatnu sigurnost protiv neautorizirane upotrebe Vaše kreditne ili debitne kartice kada kupujete online.

Svaki puta kada vršite online plaćanje Vašom MasterCard ili Maestro karticom, otvara se prozor izdavatelja Vaše kartice i traži vas da unesete osobni SecureCode, jednako kao što vas traži da "unesete PIN na bankomatu. U samo nekoliko sekundi izdavatelj kartice potvrđuje Vaše podatke i omogućava Vam da završite svoju online kupovinu.

"com</a>.

MasterCard®; SecureCode®; is a new service from MasterCard and your card issuer that provides added protection when you buy online. There is no need to get a new MasterCard or Maestro®; card. You choose your own personal MasterCard SecureCode and it is never shared with any merchant. A private code means added protection against unauthorized use of your credit or debit card when you shop online.

Every time you pay online with your MasterCard or Maestro card, a box pops up from your card issuer asking you for your personal SecureCode, just like the bank does at the ATM. In seconds, your card issuer confirms it's you and allows your purchase to be completed.
